

JOIN, or DIE.

The second dimension is anti-establishment, and this is opposed not just to political and economic elites but also to other perceived power-holders, like intellectuals or journalists or other groups at the top of society.

"Populism for me has three dimensions. One of which is an appeal to popular sovereignty over and above liberal democracy. The argument is that moral virtue and power should be with the ordinary people and not the elites.

So those three elements come together but they don't tell you a lot about what populists stand for. And here what you get is a variety of populists — from authoritarian populists to progressive populists, and they differ in their actual values."
